3rd Annual South Carolina Birth Outcomes Initiative Symposium

Join fellow health care providers, hospital administrators and community leaders to learn more from national and state experts about innovative strategies to improve health outcomes for moms and babies in South Carolina including the reduction of non-medically necessary primary C-sections, neonatal abstinence syndrome and more. This one day event will feature keynote speakers in the morning, workshop sessions in the afternoon and updates on the South Carolina Birth Outcomes Initiative (SCBOI). Registration will begin in September.

The SCBOI depends largely on financial sponsorship to host the symposium. If you would like to participate as a sponsor, please contact BZ Giese at GieseM@scdhhs.gov or 803-898-2472.
